What is Project Community Connect?

Happening in our community since 2009, the whole community comes together for a day to help our neighbors – service providers, faith groups, government agencies, private businesses, and private citizens. We're working together to help change for the better the lives of people threatened with or experiencing a loss of home and security.

Why participate?

Help people solve complex problems together. We circle around our community's vulnerable in protection and support. The result is a stronger community for everyone. Mark your calendars – we hope you'll plan to be there this year!!

Want more information? Already know you want to participate? Want to get signed up early?
